

Sectoral Roadmaps 2030: Renewables for Cities

Naples, World Urban Forum
2 September 2012

Developing a roadmap

Creating action sheets

- What is the opportunity/challenge that is addressed?
- What does the action entail?
- What is the scope of the action?
- Who takes the action?
- When will the action have an impact?

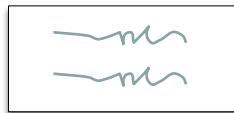

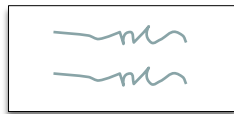

Prioritising action sheets

Sustainable urban cooking

Electrification

Energy management, planning & policy

Financing

Plenary session

Sustainable urban cooking

- Action item 1: Upscaling and commercialisation
- Action item 2: Policy and regulation
- Action item 3: Standardisation and quality control
- Action item 4: Resource assessment
- Action item 5: Adequate capacity at public sector level

Electrification

- Action item 1: Support for RE generation and use at household level
- Action item 2: Support for RE use in community institutions
- Action item 3: Attracting RE power generation for productive use
- Action item 4: Attracting industry scale RE power generation
- Action item 5: Adding large scale RE power generation (replacing fossil fuel)

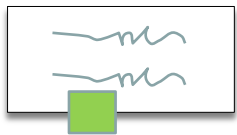

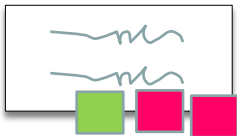

Energy management, planning, policy & regulation

- Action item 1: Implementation of energy policy/regulation/taxes
- Action item 2: Institutional capacity building
- Action item 3: Establish policy frameworks for RE/EE promotion
- Action item 4: Increase awareness at policy maker & commercial level
- Action item 5: Training and capacity building

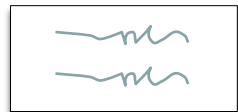

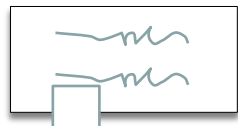

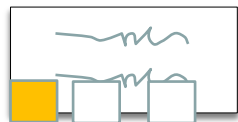

Item	Title	Observations
Line of Action 1:	Financing Mechanism at Municipal Scale /	●
Line of Action 2:	Facility for Private Sector Retailer / RE Equipment	●
Line of Action 3:	Green Technology Manufacturing Fund	●
Line of Action 4:	RE equipment consumers Facility / Fund	●
Line of Action 5:	Identifying / Assessing Potential cities for Scale-up	●

Creating a roadmap

Plenary discussion

- In how far does this roadmap reflect the participants' experiences?
- How does this roadmap correspond with the opportunities and challenges in other regions?
- How can this roadmap be communicated, and support real action on the ground?
- How can actions be verified, monitored and tracked?
