Green feed-in tariff needs to maximise solar power

Sunnier times ahead for solar energy as MPs back tariff boost for photovoltaic power
Small change  Campaign for action to boost green jobs

Construction industry workers haul giant coins across Westminster Bridge yesterday to highlight their call for an extra 10p to be added to tariffs in the government's clean energy cashback scheme. The campaign group We Support Solar claims the increase could rescue 30,000 green jobs.

Call for leading police body to be replaced

By James Boxell, Home Affairs Correspondent

The Association of Chief Police Officers should be stripped of its powers to set law enforcement policy across the country and make way for a beefed-up national policing agency, an influential think-tank has claimed.

In a comprehensive report into policing, to be published this week, the centre-left Institute for Public Policy Research says the national body is essential if the country wants real progress in the fight against organised crime.

Sir Hugh Orde, the former Northern Ireland police chief who heads Acpo, has called for skilled managers of police, who are not directly accountable to the Home Office, to be brought in.
Government to slash subsidies for solar power

The government is set to slash subsidies for large-scale solar installations to divert money to smaller alternative energy projects, in a move that the industry has called a "hazardous strategic mistake."

UK government unveils plans to slash solar feed-in tariffs

The move is expected to deal a death blow to large-scale low-carbon developments.
