

Leveraging Long-Term Energy Scenarios (LTES) to Attract Investments

Bridging Planning and Funding for Energy Transitions

Gustavo Naciff de Andrade

Deputy Head of Energy Economics | EPE

September 9th, 2024

MINISTÉRIO DE
MINAS E ENERGIA

Priorities

- **Accelerating Financing for the Energy Transitions**
- Social Dimension of Energy Transitions
- Innovative Perspectives on Sustainable Fuels

Energy Transition will need massive Investments...

*“Global investment across all transition technologies reached a record high of USD 1.3 trillion in 2022. Yet **annual investment** would need to **more than quadruple** to remain on the **1.5°C pathway.**”*

*“Clean energy investment **in emerging and developing economies outside China** needs to rise **more than sixfold in next 10 years,** but securing affordable financing is a major hurdle.”*

The **Global Coalition for Energy Planning (GCEP)** aims to strengthen energy planning, with a special focus on developing countries. The Coalition's long-term vision encompasses three main components:

- **Reducing the Cost** of Energy Transitions
- Enhancing Countries **Capabilities to Attract Investment** for Energy Transitions
- **Reinforcing Energy Planning to Drive** the Energy Transition
