

Long-term energy scenarios (LTES) for developing national energy transition plans in Africa

Webinar series

GET.transform experience supporting LTES development in partner countries

Christopher Gross
GET.transform
December 1st 2021

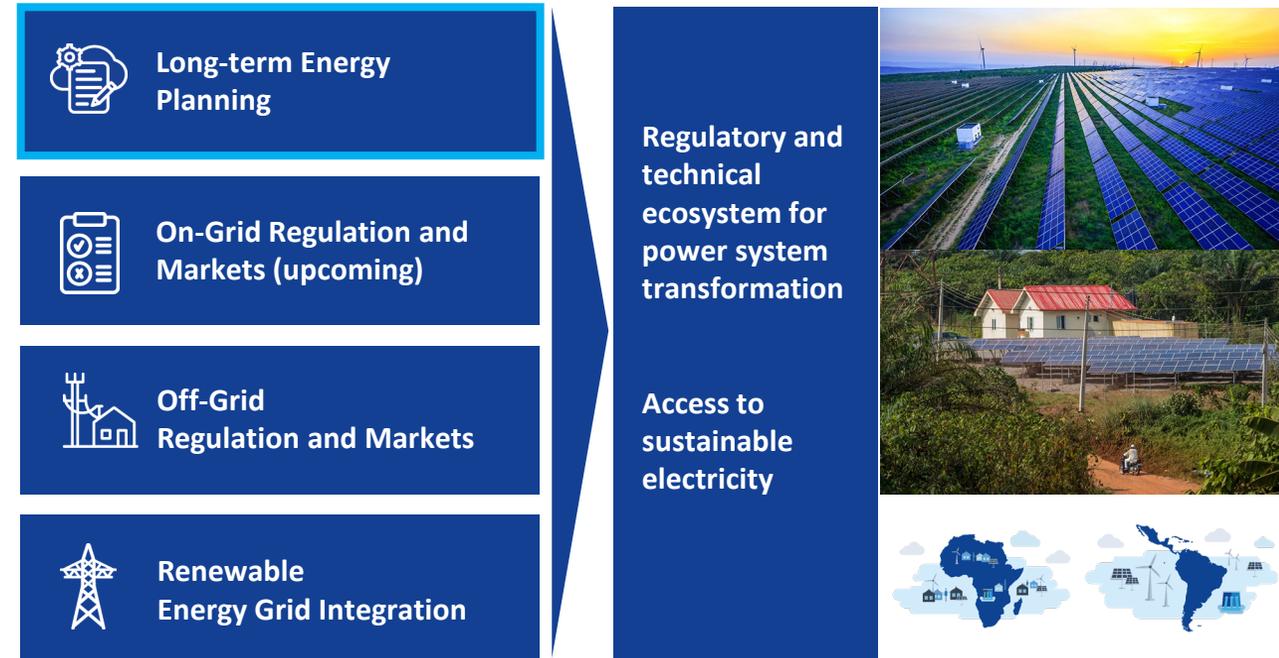

GET.transform is supported by

What is GET.transform?

European technical assistance programme supporting **national and regional public partners in Africa and Latin America**

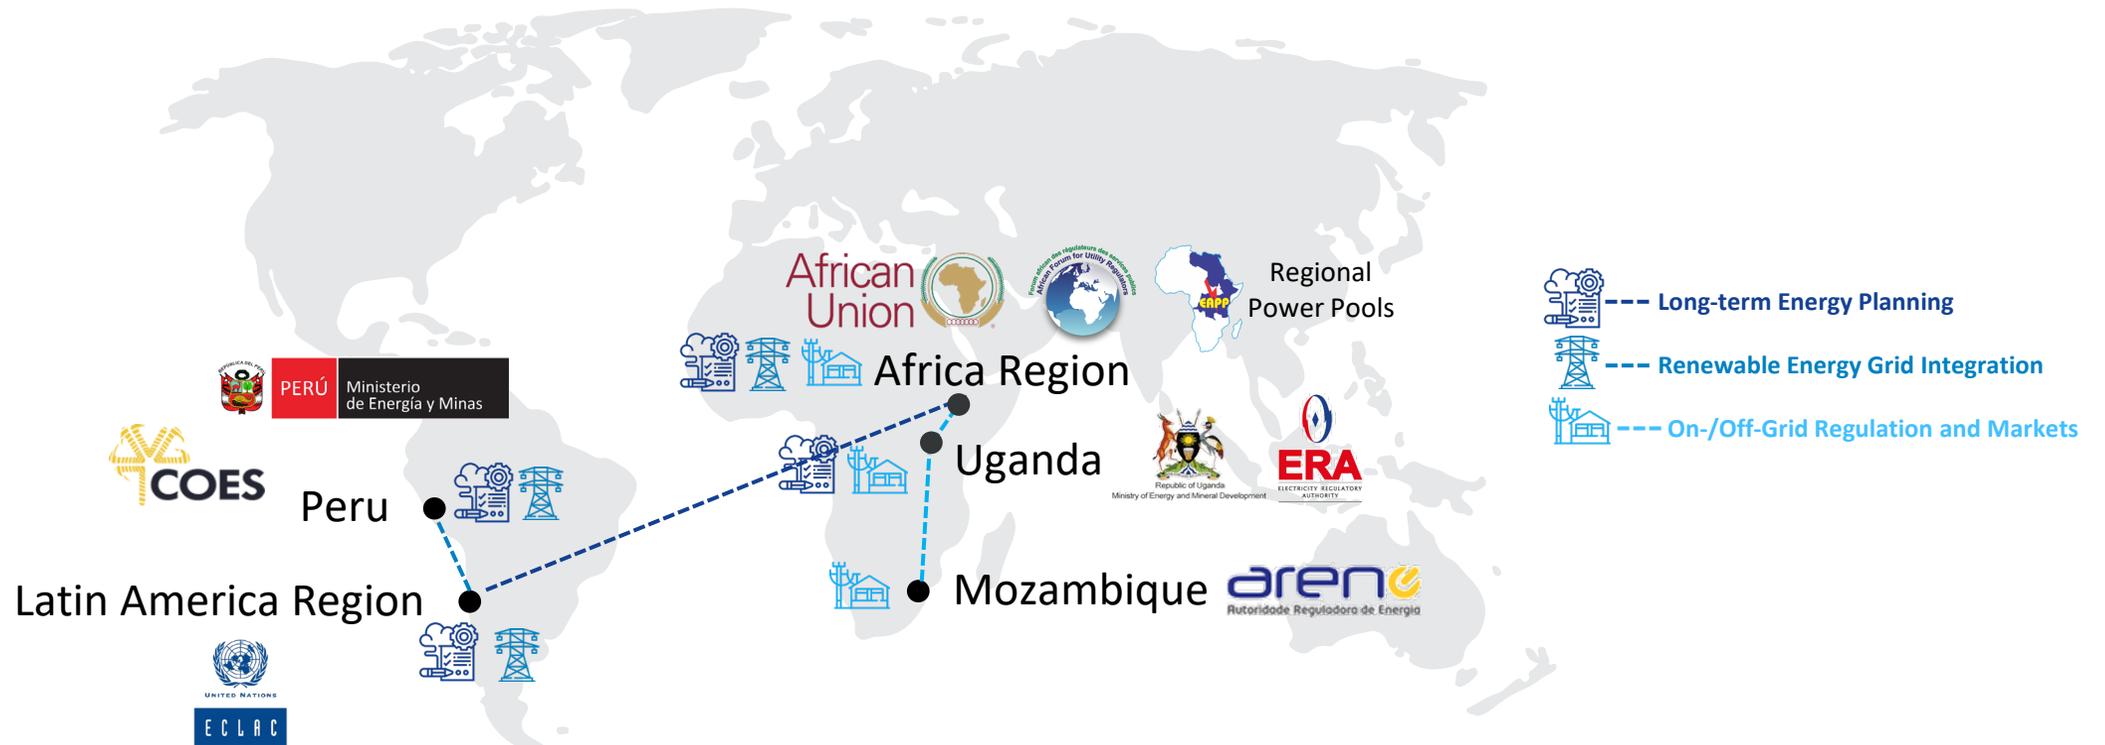

- To advance their power sector transformations; and
- To contribute to knowledge sharing and mainstreaming of country and regional experiences.

GET.transform is supported by

GET.transform partner countries and regions

GET.transform contribution to Long-Term Energy Planning

Ongoing:

-  In-depth support to GET.transform partner countries in developing national energy plans
-  Supporting regional knowledge sharing and peer exchange
-  Supporting the development of the African Continental Master Plan (Transmission Planning Lot)

Upcoming:

-  Deepened partnership with IRENA to build capacity and to disseminate training material on the development and use of LTES
-  Development of regional insight reports and guidelines, e.g. Energy Modelling Guidebook
-  Engaging with and supporting more countries on national Long-Term Energy Planning

Technical coordination and collaboration with:

EU Global Technical Assistance Facility for Sustainable Energy - TAF
