

Long Term Energy Scenarios

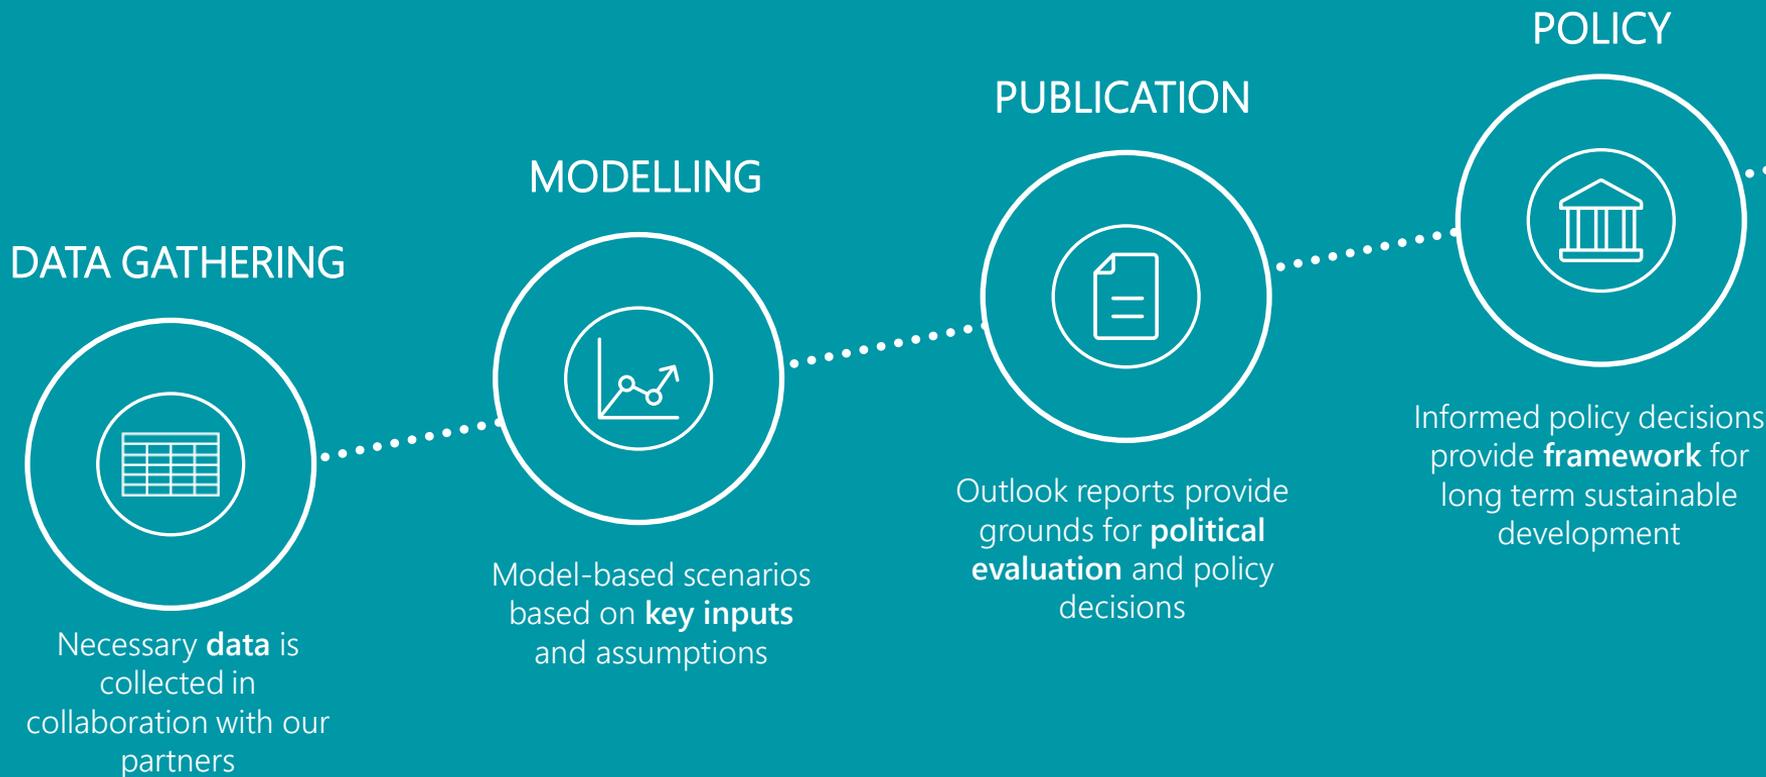

Bjarke C. Nepper-Rasmussen
Advisor

Energy scenarios

Partner countries where energy system modelling is a part of the cooperation activities

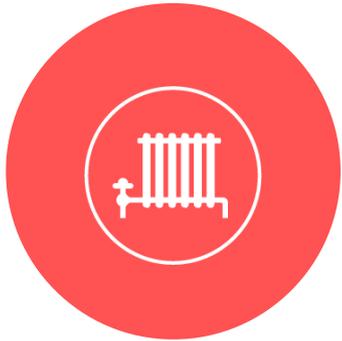

The overall process from analysis to **impact**

Transition features of great importance

Efficiency

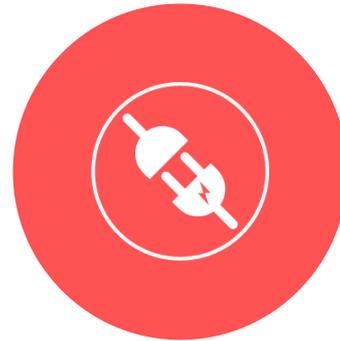

- Energy efficiency
- Decoupling demand and GDP

RE

- Cost effective
- Clean
- Transition

Electrification

- Simple way to decarbonise most sectors
- Hand-in-hand with RE

Flexibility

- Utilising existing infrastructure
- Market driven
- Price signals

Thank you
