

IRENA Policy Talks 2021

Renewable Energy Policies for the Energy Transitions: Focus on Heating and Cooling

Bios of speakers

Dr. Rabia Ferroukhi
Director, Knowledge, Policy and Finance Centre, IRENA

At IRENA since 2011, Rabia Ferroukhi is currently the Director of the Knowledge, Policy and Finance Center. She is an international economic development and energy expert focused on the renewables-based energy transitions, its long-term socio-economic impacts and financing needs. She leads a multi-disciplinary team to provide valuable evidence-based policy and investment to advice countries and contribute to the global discourse on the energy transitions. Ms. Ferroukhi worked with the public and private sectors, including with governments globally, energy companies, international institutions, and academia and research centers. She holds a Ph.D. in Economics from the American University in Washington DC.

Ms. Diala Hawila
Programme Officer, KPFC, IRENA

Diala Hawila is a Programme Officer, Policy Advice in the RE Markets unit in the Knowledge, Policy and Finance Centre, based in Abu Dhabi. She has been working in the Policy Unit of IRENA since 2012. During this time, she has managed, coordinated and co-authored reports related to renewable energy policies and benefits entailing the series on Auctions, Policies in a Time of Transition including heating and cooling, and Leveraging Local Capacity, among others. Prior to that, she worked at PricewaterhouseCoopers on supporting the development of policies and procedures for government entities in Abu Dhabi. She holds a Master's degree in Systems Engineering and Management focusing on Renewable Energy Policy.

Mr. Jinlei Feng
Programme Officer, KPFC, IRENA

Jinlei Feng is the Programme Officer at Knowledge, Policy and Finance Centre of International Renewable Energy Agency (IRENA), which he joined in March 2018. His research work has focused on policies to deploy renewable energy in end-uses, including heating and cooling, transport, as well as bioenergy and policies for renewables in cities. Prior to joining IRENA, he has over ten years of experience in renewable energy and climate change topics in various international organisations. He holds a Master's degree in management from the Renmin University of China (2007).

Mr. Emanuele Bianco
Programme Officer, KPFC, IRENA

Emanuele Bianco is a Programme Officer at the International Renewable Energy Agency (IRENA), in the Renewable Energy Market Unit. His areas of interest cover the renewable energy policy issues across the whole spectrum of the energy system, including variable renewable energy system integration, power market design, electrification and green hydrogen. He contributed to IRENA's analysis on the renewable energy market in Southeast Europe, auction design, green hydrogen and power market structures. He has a combined ten years of experience in renewable energy policy analysis. He has received a Master's degree in Nuclear and Energy Engineering from the Polytechnic School of Turin.
