

Nigeria Country Presentation on Long-Term Energy Scenarios for Developing National Energy Transition Plans*

By

Prof. Eli Jidere Bala

Director General/CEO, Energy Commission of Nigeria

Email: dg@energy.gov.ng

*Webinar Series by International Renewable Energy Agency (IRENA), 3rd December 2021

Outline

- Development of Scenarios
- Use of Scenarios
- Scenario Capacity Building

Development of Scenarios

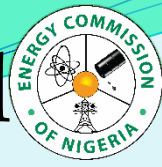

□ Governance Structure:

- Energy Planning is part of National Planning under the Federal Ministry of Finance, Budget and National Planning
- ECN in collaboration with relevant MDAs, OPS, CSOs plans for the energy sector.
- Includes sub-sectoral plans
- Considers factors such as economic, demography, industrial development path, environmental policy
- National Steering Committee with Technical Implementation Committee
- Technical Implementation Committee presents results to National Steering Committee for presentation at FEC for approval

Development of Scenarios Cont'd

- Boundary of Planning Scenarios:
 - Within economic; and
 - Environmental policies

Use of Scenarios

- Purpose of the use of the scenario building:
 - Forecast for infrastructural development
 - Exploiting alternatives
 - To raise target ambitions
 - Drive innovations

- Communication of Scenario results:
 - Publications
 - Workshops/seminars

Scenarios Capacity Building

- ❑ Planning Capacity in Government:
 - Mainly in-house and external capacity building e.g. IAEA;
 - Now incorporating universities research institutions
